About Southcott

Who are we?

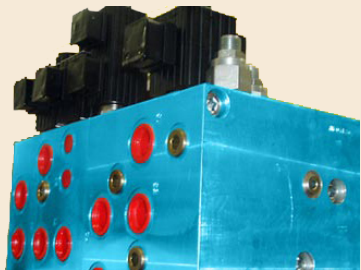

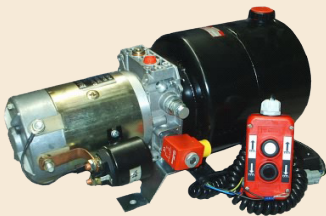

Founded in 1886, Southcott Pty Ltd remains 100% Australian owned while growing into a major force in the hydraulic and fluid power industry.

Products are distributed nationally from offices in every state, with an extensive network of distributors. Additionally, Southcott has two manufacturing plants for its range of complex manifold units, axial piston pumps and motors and the Child range of hose couplings and adaptors.

Southcott prides itself on industry leading service levels as it continues to expand its customer base with a belief and commitment to mutually beneficial, loyal and ongoing relationships.

Southcott has the expertise, resources and product range to provide a complete hydraulic solution to our customers, in a wide range of industries.

Employing over 200 people, Southcott has the capability and drive to exceed customers' expectations time and again.

Service

Account Management

Southcott believes that delivering the best possible service is a core value critical to business today. As such we have structured our operations to ensure that you can rely on Southcott as your supplier of hydraulic product.

Each branch has dedicated and experienced Account Managers who oversee your account, acting as a point of contact when necessary. Additionally, a committed customer service team is available to ensure orders are processed and despatched efficiently.

Making It Easier To Do Business

Whatever your requirements are, Southcott is willing to assist. Various solutions for customers have included special labelling and kit formation for OEM customers, and joint marketing and cross referencing for distributors.

Southcott also has a complete range of testing and troubleshooting equipment, ensuring total product support for our customers.

Quality

Southcott's commitment to product quality is paramount. All manufacturing processes are quality assured to ISO9001 and we seek to deal with suppliers who uphold the same ethics and commitment to quality.

Fluid Connectors

Child® Hose Couplings and Adaptors

Acquired by Southcott Pty Ltd in 1987, Child® products are widely respected as being of consistently high quality, as well as having a range that is second to none.

Manufactured in Australia, Child® couplings and adaptors are subject to strict quality control measures on both materials as well as machining. Additionally, this provides a flexible and responsive supply of product.

Child® hose couplings have been fully tested and partnered with Gates hydraulic hose for over 25 years.

Recently, Southcott pioneered ArmaCoat® plating, which is environmentally friendly, but also exceeds SAE salt spray tests by over 5 times before red rust appears.

Southcott can also provide custom designed tube assemblies, using the latest in CNC technology to ensure the highest quality tube solutions.

Child® is the leader in fluid connectors in Australia and is the Australian made choice.

Fluid Connectors

Gates Hydraulic Hose and Couplings

Gates is the number one non-tyre rubber manufacturer in North America and a leading manufacturer of quality industrial fluid power products. Gates employs over 13,000 people in over 20 countries.

Gates' hydraulic products are used on a wide range of agriculture, construction, fire, forestry, mining and coring equipment.

Constantly pushing the boundaries of excellence, Gates has been recognised as a leading innovator in new systems and technology.

Major international customers of Gates include BMW, Caterpillar, Daimler-Chrysler, Ford, John Deere and Motion Industries.

Gates hose and coupling range are widely regarded as leading the industry in product quality, ensuring total cost of ownership is kept to a minimum. Additionally, Southcott and Gates provide a Safe Hydraulics training program, to ensure all staff are trained in correct product usage, maximising safety and product operating life.

So, whether you demand abrasion resistance or a flexible bend radius, Gates and Southcott have the global solution for you.

Hydraulic Solutions

Brands Represented

Southcott represent a wide variety of some of the world's leading brands of hydraulic products, ensuring that our customers' needs are fulfilled.

Additionally, Southcott provides custom manifold design as well as a variety of control systems including secure radio remote controlled solutions.
